(CMS Net) - Information Bulletin #166**

Updated Restricted Drug Table

Effective for dates of service on or after April 1, 2006, the California Children's Services (CCS)/Genetically Handicapped Persons Program (GHPP) list of drugs not included in a physician Service Code Grouping (SCG) has been updated. Added to the list, and therefore requiring a separate SAR, on or after April 1, 2006, are:

Sildenafil (Revatio™, Viagra™)

Vardenafil (Levitra™)

Tadalafil (Cialis™)

Anti-Inhibitor

Von Willebrand Factor

AHF, Human/VWF, Human (a combination factor product that includes Von Willebrand Factor)

Factor VIIa (Recomb) – Note: this product has been restricted, but is now identified as Q0187, instead of Z5230

Note: For Regional Offices and independent Counties who have been instructed to do a manual entry of the drug Revatio and its NDC, this temporary work-around is no longer needed. The above drugs are now in the formulary.

In addition, the following enteral products were referenced in "This Computes! #130" second bullet (list slightly amended below), as "not yet on the Restricted Drug List...but will be added in the coming months". These products, referenced in the Medi-Cal Manual as Mineral/Protein Replacements/Supplements, have been added to the Restricted Drug List effective April 1, 2006 and therefore require a separate SAR for enteral products provided on or after April 1, 2006:

Elec care
ProVimin powder
Complete amino acid mix powder
Complex MSUD amino acid powder and bar
Essential amino acid mix powder
Phenylade amino acid bar
Casec or Casein powder

This information is reflected on page 6 in the Medi-Cal Manual at the following web address:

http://files.medi-cal.ca.gov/pubsdoco/publications/masters-MTP/Part2/calchildsar_m00i00o03o04o07o09o11a02a04a05a06a07a08p00v00.doc

Additional Note: Referring to “This Computes! #130”, the first bullet, BCAD1, Tyros1, GA, HCY1, LMD, OA1, PFD1, and WND1 are all now Medi-Cal benefits and are therefore on the Restricted Drug List (Nutritional Therapy, Special Formulations) and require a separate SAR.
